## ALFRESCO & ALUMINIUM

**polytec**'s clean-lined Aluminium framed doors fulfil demand for well-resolved cabinetry solutions suited to indoor kitchens and the growing trend of having a fully equipped, covered outdoor kitchen counterpart.

Designed for indoor and undercover Alfresco kitchen applications, Aluminium framed doors are available in five frame profiles. Further customisation is possible for more or less translucent or reflective effect, via an array of glass inserts.

**polytec**'s Aluminium framed doors are a decorative lightweight frame, with a variety of modern and sleek designs, also available with 5mm Compact laminate inserts.

Aluminium framed doors are easy to clean and stain resistant, made-to-order and Australian Made with a seven year limited warranty on residential and commercial applications.

Doors in **ALFRESCO** 2mm/55mm Black Anodised frame with Cinder Matt inserts.  
Internal kitchen overhead cupboard doors and shelving in **MELAMINE** Notaio Walnut Woodmatt.

## ENVIRONMENT & SUSTAINABILITY

At **polytec**, sustainability is ingrained in the core of our business operations, products, and work practices. Our continual dedication to improving and appropriately managing the environmental impact of our products involves our commitment to steadfastly reducing our carbon footprint, minimising waste, optimising energy efficiency and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

In our pursuit of responsible waste management, we implement various recycling programs encompassing aluminium, metals, used oils, and timber waste, which is repurposed into packaging, particleboard, and energy. We actively engage with local government environmental initiatives, subject ourselves to voluntary audits, and uphold our internal Energy and Carbon Management Policy (ECM), aligned with the Australian Government's Energy Efficiency Opportunities (EEO) program.

Our network of national facilities boasts over 53,000 solar panels, generating 15,238,000 kWh of renewable energy – equivalent to planting 7,377 trees and preventing the emission of 11,000 tonnes of CO<sub>2</sub>. The Oberon facility is Australia's largest rooftop solar system, with 27,000 panels spread across 8 hectares of rooftop.

In our ongoing commitment to sustainability, **polytec** continues to refine and enhance our practices to contribute to the establishment of a circular economy, fostering a better future for all.

**polytec** doors, panels and benchtops are certified Australian Made & Owned.

## CARE & MAINTENANCE

**polytec** Aluminium framed doors are manufactured from the highest quality materials and designed to provide years of trouble free service. Whilst your doors are made from the highest quality anodised aluminium extrusion, care should be taken to wipe up spills immediately.

The surface of **polytec**'s Compact laminate is made from a stain-resistant melamine based resin. The toughness and high impermeability of this surface means that **polytec**'s Compact laminate should require no more than wiping with a soft cloth, dampened with plain water or a mild household detergent mix to remove all common household spills. **polytec** Alfresco doors should always be installed in an undercover application and should not be exposed to direct sunlight or consistent environmental forces that could affect the product.

**polytec** doors should be cleaned by wiping down with a damp soft cloth and warm soapy water. Followed by drying using a soft or microfibre cloth so as not to leave any residue on the door or panel. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit [www.polytec.com.au](http://www.polytec.com.au) for specific care and cleaning information. Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [www.polytec.com.au](http://www.polytec.com.au).

**polytec** swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit [www.polytec.com.au](http://www.polytec.com.au)

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
