BENCHTOPS range

polytec's innovative Benchtops range contains over 150 realistic stone structures, woodgrains and neutral solid colours and remains unrivalled in the decorative surfaces industry.

The Woodmatt laminates match the perception of authentic timber in both look and feel. The new range of **polytec** timber prints blend the old familiar timbers with new neutral coloured tones to evoke the feeling of warmth and comfort. **polytec's** Matera range combines the cool appearance of honed stone in beautiful marble, travertine and cement style prints with an easy care, super matt finish.

polytec's Smooth finish is made to reflect a soft to touch finish with slight reflectance values, providing easy maintenance. This finish is made to elevate a base laminate to something far more superior and luxe. Smooth is luminescent and complements the new colour range perfectly, enhancing the importance of texture and feel.

polytec's newest innovation in decorative laminates delivers exceptional fingerprint resistant technology in the purest matt form. The silky-smooth finish of Venette creates an inviting and pleasant touch experience, whilst the pure matt surface assures low light reflection, reducing the need for constant care and cleaning.

polytec Benchtops are offered in three thicknesses and four different profiles to provide solutions to every day project challenges and enable maximum design flexibility.

The **polytec** colour range is made for the Australian lifestyle, holding perpetual value, and creating a new journey towards sustainable design. The complete array of stone structures and woodgrain benchtops are represented with precision, true to natural materials in colour, clarity and depth, demonstrating investment in state-of-the-art manufacturing technologies.

ENVIRONMENT & SUSTAINABILITY

At **polytec**, sustainability is ingrained in the core of our business operations, products, and work practices. Our continual dedication to improving and appropriately managing the environmental impact of our products involves our commitment to steadfastly reducing our carbon footprint, minimising waste, optimising energy efficiency and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

In our pursuit of responsible waste management, we implement various recycling programs encompassing aluminium, metals, used oils, and timber waste, which is repurposed into packaging, particleboard, and energy. We actively engage with local government environmental initiatives, subject ourselves to voluntary audits, and uphold our internal Energy and Carbon Management Policy (ECM), aligned with the Australian Government's Energy Efficiency Opportunities (EEO) program.

Our network of national facilities boasts over 53,000 solar panels, generating 15,238,000 kWh of renewable energy — equivalent to planting 7,377 trees and preventing the emission of 11,000 tonnes of CO₂. The Oberon facility is Australia's largest rooftop solar system, with 27,000 panels spread across 8 hectares of rooftop.

In our ongoing commitment to sustainability, **polytec** continues to refine and enhance our practices to contribute to the establishment of a circular economy, fostering a better future for all.

polytec doors, panels and benchtops are certified Australian Made & Owned.

CARE & MAINTENANCE

polytec's Benchtops are supplied with a protective film to protect the surface during installation. This film must be removed within three months of installation.

The surfaces of **polytec's** Benchtops are made from a stain-resistant resin. The toughness and high impermeability of this surface means that **polytec's** Benchtops & laminate should require no more than wiping with a soft cloth, dampened with plain water or a household detergent mix to remove all common household spills.

polytec's Benchtops & laminate should be cleaned by wiping down with a damp soft cloth and warm soapy water. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit www.polytec.com.au for specific care and cleaning information.

IMPORTANT

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit www.polytec.com.au.

polytec swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit www.polytec.com.au.

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
