ULTRAGLAZE & ULTRAMATT doors & panels

polytec's Ultraglaze & Ultramatt doors and panels are an acrylic, premium surface appropriate for residential and commercial joinery. The fingerprint and scuff resistant properties of Ultramatt Premium Matt makes it a suitable option for high-traffic zones, while Ultraglaze Premium Gloss remains an innovative high-gloss finish in the decorative surfaces industry.

Ultraglaze Premium Gloss creates a classic, luxurious feel while remaining a practical design aesthetic. The light reflectance value of Ultraglaze allows for a tastefully modern design with easy to maintain qualities.

Ultramatt Premium Matt is the ultimate pure matt surface in decorative joinery applications. Ultramatt can be integrated into any style owing to the versatile neutral colour range, including solids to subtle metallics. The sense of touch has been elevated in interior environments with an increased specification of handle-free doors with low reflective qualities. This has constituted the desire for a smooth surface appearance with an unsurpassed matt level.

polytec's Ultraglaze & Ultramatt are available as fully made-to-order doors and panels. The Ultraglaze & Ultramatt range is available in 18mm E0 MR MDF alongside a host of door profiles such as Aluminum Finger Pull, Bevel Edge, and Square Edge with matching 1mm ABS edgetape.

All Ultraglaze & Ultramatt solid, neutral colours complement the timber patterns in Woodmatt and Ravine ranges for a personalised design. Confidently use one or two colours in your entire joinery for a simple, contemporary statement.

Ultraglaze & Ultramatt offers a top quality, luxurious appearance with easy maintenance and scuff resistant qualities. Incorporating Premium Gloss and Matt finishes into your project is the perfect way to add visual interest to a pared-back, neutral palette.

ENVIRONMENT & SUSTAINABILITY

At **polytec**, sustainability is ingrained in the core of our business operations, products, and work practices. Our continual dedication to improving and appropriately managing the environmental impact of our products involves our commitment to steadfastly reducing our carbon footprint, minimising waste, optimising energy efficiency and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

In our pursuit of responsible waste management, we implement various recycling programs encompassing aluminium, metals, used oils, and timber waste, which is repurposed into packaging, particleboard, and energy. We actively engage with local government environmental initiatives, subject ourselves to voluntary audits, and uphold our internal Energy and Carbon Management Policy (ECM), aligned with the Australian Government's Energy Efficiency Opportunities (EEO) program.

Our network of national facilities boasts over 53,000 solar panels, generating 15,238,000 kWh of renewable energy — equivalent to planting 7,377 trees and preventing the emission of 11,000 tonnes of CO2. The Oberon facility is Australia's largest rooftop solar system, with 27,000 panels spread across 8 hectares of rooftop.

In our ongoing commitment to sustainability, **polytec** continues to refine and enhance our practices to contribute to the establishment of a circular economy, fostering a better future for all.

polytec doors, panels and benchtops are certified Australian Made & Owned.

CARE & MAINTENANCE

polytec do not recommend the use of Evolution products in a sliding or non-fixed application (hinged) unless the use of a mechanical stabilising system is fitted. Ultraglaze & Ultramatt doors and panels are supplied with a protective film to protect the surface during installation. This film must be removed within three months of installation.

Your Ultraglaze & Ultramatt doors and panels are made from a Moisture Resistant Medium Density Fibreboard (MR MDF), but as with many wood based panels, they are not waterproof. Care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

Ultraglaze & Ultramatt doors and panels should be cleaned by wiping down with a damp soft cloth and warm soapy water. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit www.polytec.com.au for specific care and cleaning information.

IMPORTANT

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

Createc and Venette are a painted product and as with many painted materials a slight odour may occur when fresh, or if not permitted to air. The products comply with Green Building Council of Australia. Green Star Design & As Built V1.3 – 13.1.2B & 13.2. Green Star Interiors V1.3 – 12.1.2B for emission of VOCs.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit www.polytec.com.au.

polytec swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit www.polytec.com.au.

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
