## WARDROBE

**polytec's** Wardrobe range comes in a variety of styles and finishes, and is the quintessential ingredient when it comes to organising belongings and items such as clothing, shoes, jewellery and more. **polytec** supplies a wide range of affordable wardrobe solutions that will suit all budgets, while utilising luxurious colours and finishes to elevate your wardrobe. Choose from our decorative and durable Melamine board, striking Aluminium framed glass doors, the Ravine range or the new 25mm Surano doors.

To give your wardrobe distinctive character, our range offers an extensive variety of colour and decorative finish options, including Texture, Matt, Ashgrain, Ravine, Woodmatt, and the new Smooth range, adding a modern touch to any space.

The Woodmatt finish offers a subtle woodgrain embossing with an overall matt surface to look and feel like a true veneer, setting a benchmark in Australian Made door and panel manufacturing.

**polytec's** Ravine range showcases the best natural touch timber surface lightly coloured with warm and inviting shades.

**polytec's** latest Smooth finish is made to reflect a soft, painted finish with slight reflectance values, perfect for contemporary homes. The new Smooth finish enhances the importance of texture and feel with a range of solid, neutral colours that are grounding and calming.

The new 25mm Surano door range is available in a variety of woodgrain and solid colour options, and are manufactured using 25mm MDF with 130mm wide stiles and rails with a 9mm MDF infill panel. This shaker style door will create an element of luxe character, enhanced by the selection of either Woodmatt, Ravine, Matt or Smooth finishes, adding a modern touch to any space. Opt for the latest Fluted Glass inserts for added textural interest when paired with Surano doors.

At **polytec**, we strive to provide beautifully crafted decorative surfaces of unmatched quality. With an outstanding array of colours, styles and finishes, the **polytec** range of products offers you the perfect solution for all of your storage requirements.

## ENVIRONMENT & SUSTAINABILITY

At **polytec**, sustainability is ingrained in the core of our business operations, products, and work practices. Our continual dedication to improving and appropriately managing the environmental impact of our products involves our commitment to steadfastly reducing our carbon footprint, minimising waste, optimising energy efficiency and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

In our pursuit of responsible waste management, we implement various recycling programs encompassing aluminium, metals, used oils, and timber waste, which is repurposed into packaging, particleboard, and energy. We actively engage with local government environmental initiatives, subject ourselves to voluntary audits, and uphold our internal Energy and Carbon Management Policy (ECM), aligned with the Australian Government's Energy Efficiency Opportunities (EEO) program.

Our network of national facilities boasts over 53,000 solar panels, generating 15,238,000 kWh of renewable energy – equivalent to planting 7,377 trees and preventing the emission of 11,000 tonnes of CO2. The Oberon facility is Australia's largest rooftop solar system, with 27,000 panels spread across 8 hectares of rooftop.

In our ongoing commitment to sustainability, **polytec** continues to refine and enhance our practices to contribute to the establishment of a circular economy, fostering a better future for all.

**polytec** doors, panels and benchtops are certified Australian Made & Owned.

## CARE & MAINTENANCE

**polytec** do not recommend the use of Melamine products in a sliding or non-fixed application (hinged) unless the use of a mechanical stabilising system is fitted. Melamine doors & panels are supplied with a protective film to protect the surface during installation. This film must be removed within three months of installation.

Your **polytec** doors and panels are made from a Moisture Resistant Medium Density Fibreboard (MR MDF), but as with many wood based panels, they are not waterproof. Care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

**polytec** doors and panels should be cleaned by wiping down with a damp soft cloth and warm soapy water. Followed by drying using a soft or microfibre cloth so as not to leave any residue on the door or panel. For more stubborn stains use a good quality streak free glass cleaner. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit [www.polytec.com.au](http://www.polytec.com.au) for specific care and cleaning information. Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [www.polytec.com.au](http://www.polytec.com.au).

**polytec** swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit [www.polytec.com.au](http://www.polytec.com.au).

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
