XENOLITH

polytec's innovation continues with the introduction of Xenolith, a 15mm thick premium solid coloured core composite laminate product which can be used in various high-traffic applications.

Xenolith is available for both vertical and horizontal applications. It can be used for benchtops, vanities, cafe tops, wet room partitioning and covered alfresco areas. The unique solid coloured core allows for exposed ends with no join lines caused by a laminated edge, matching the colour of choice. This premium product is available in a variety of edge profiles, machined into the surface to provide a seamless look.

Xenolith is offered in four marble patterns: Calacutta D'oro, Calacutta Grey, Marmo di Torre and Marmo di Monte, each with a touch of high-end luxury. The modern Grey Cement and White Cement inspired by industrial design, Portland Stone and the brand new Solid White create flexible design opportunities. All colours are available in a soft, hygienic and antibacterial Smooth finish in 3660mm x 1830mm full sheets and made-to-order tops up to 4400x1830mm.

The surface of **polytec**'s Xenolith is made from a stain and water-resistant resin. The toughness and high impermeable properties of this surface mean that polytec's Xenolith should require no more than wiping with a soft cloth, dampened with plain water or a household detergent mix to remove all common household spills.

Visit www.polytec.com.au for specific care and cleaning information.

XENOLITH range

polytec swatches and samples represent a small area of the overall colour structure.
To view the large colour sample, visit www.polytec.com.au.

Dark coloured surfaces will show fingerprints and require more care and maintenance than lighter coloured surfaces.
It is recommended to test a product sample prior to colour selection.

ENVIRONMENT & SUSTAINABILITY

At **polytec**, sustainability is ingrained in the core of our business operations, products, and work practices. Our continual dedication to improving and appropriately managing the environmental impact of our products involves our commitment to steadfastly reducing our carbon footprint, minimising waste, optimising energy efficiency and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

In our pursuit of responsible waste management, we implement various recycling programs encompassing aluminium, metals, used oils, and timber waste, which is repurposed into packaging, particleboard, and energy. We actively engage with local government environmental initiatives, subject ourselves to voluntary audits, and uphold our internal Energy and Carbon Management Policy (ECM), aligned with the Australian Government's Energy Efficiency Opportunities (EEO) program.

Our network of national facilities boasts over 53,000 solar panels, generating 15,238,000 kWh of renewable energy – equivalent to planting 7,377 trees and preventing the emission of 11,000 tonnes of CO2. The Oberon facility is Australia's largest rooftop solar system, with 27,000 panels spread across 8 hectares of rooftop.

In our ongoing commitment to sustainability, **polytec** continues to refine and enhance our practices to contribute to the establishment of a circular economy, fostering a better future for all.

polytec doors, panels and benchtops are certified Australian Made & Owned.

CARE & MAINTENANCE

The surface of **polytec's** Xenolith is made from a stain-resistant melamine based resin. The toughness and high impermeability of this surface means that **polytec's** Xenolith should require no more than wiping with a soft cloth, dampened with plain water or a household detergent mix to remove all common household spills.

For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful surface for many years.

Visit www.polytec.com.au for specific care and cleaning information. Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit www.polytec.com.au.

polytec swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit www.polytec.com.au.

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
