

# polytec Heat Deflectors

polytec Heat Deflectors have been designed to deflect heat away from Thermolaminated doors. polytec recommends that Heat Deflector Strips be used alongside ovens and dishwashers that do not have a deflector surround supplied. Strips are available in two lengths: 2400mm & 750mm. Heat Deflectors are available in Stainless Steel finish only.

If you require a quotation or wish to place an order for polytec Heat Deflectors phone your sales representative or the polytec customer service on 1 300 300 547

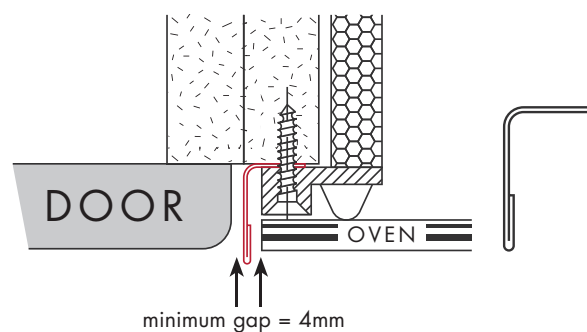

## Straight Heat Deflectors

Recommended Method

## Angled Heat Deflectors

Recommended Method

polytec recommends the following:

When installing ovens and dishwashers (flush mounted or integrated) in a kitchen using polytec Thermolaminated doors, please contact your polytec sales representative for clarity of the location and requirement of heat deflectors.

In some cases, the opening of an oven/dishwasher door during high temperature operation the escaping heat and moisture may affect the finish on the cupboard doors.

polytec will not be held responsible for claims regarding the failure of doors if the above installation methods are not applied.
